The screenshot shows a form for editing metadata. On the left, there are five sections: 'Primary Metadata *', 'Taxonomy Topics', 'Taxonomy Facets', 'Page Javascript', and 'Other Metadata *'. The 'Page Javascript' section is currently empty. At the bottom, there are two buttons: a dark grey 'Save' button and a light grey 'View changes' button.

I don't know if it can be done – there's no Javascript tab/area.
